

THE MARK

Watt flyball governor, reduced.

Ink structure, rust flyballs - rust is never recolored.

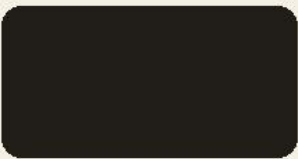

Clearspace: one flyball diameter on all sides.

Minimum size 16px; use joe-favicon.svg below 48px.

Dark surfaces: joe-mark-dark.svg (cream structure).

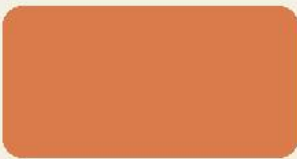

PALETTE

Ink
#211D19
structure, text

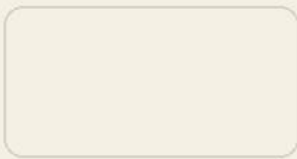

Rust
#C05F2E
primary accent

cool foil

TYPOGRAPHY

Zilla Slab

Display & headings - Bold / SemiBold

Source Sans 3 - body and interface text, regular and semibold.

Body 1.0-1.06rem / 1.6 line height. Captions 0.85rem tracked.

IBM Plex Mono - code, CLI, identifiers, hex values.

All three OFL-licensed, self-hosted woff2. Wordmark is drawn paths, never typed.

VERBAL IDENTITY

joe - Joe Operates Everything

Recursive backronym, GNU tradition. Secondary placement only: README first line, docs opener, site footer, man-page NAME line. Never inside or beside the mark.

Joe is a self-hosted, open-source AI agent for your infrastructure.

Primary positioning line. Leads on high-stakes surfaces; the backronym is the wink.

Named for the centrifugal governor - the first machine that governed a machine.

Origin story, one line. The backronym is the reach; the mark is the restraint.

RULES

- Do use the lockup on first appearance per surface; the bare mark thereafter.
- Do keep dark variants on transparent backgrounds - never bake in a ground.
- Don't recolor the flyballs, add words to the mark, or typeset the wordmark in a font.
- Don't place the backronym as the sole positioning statement on a landing surface.
